XINHUA FINANCE AGENCY™

is chartered by Xinhua News Agency Asia-Pacific Regional Bureau as the official channel to provide China's business news, financial data and information to financial Institutions worldwide.

XFA is the gateway for the global community to gain true access into the heart of China's business world. XFA empowers global investors with information to help them succeed in today's China business world.

Quality News Line

is the basic real-time information service for China's business and financial news, with top news, breaking news and editor's choice. It also covers important world news.

Quality News Classification

summarizes the most important news in China and worldwide. It is structured using four sections with focus on politics, economy, industries and securities, to help readers to capture the main dynamics.

A-Share Market News Line

focuses on the detailed news of A-share market in China. The services includes information regarding listed companies, such as announcements, authoritative views, as well as macro- and industrial information, directly related to stock market investment, providing a general image of China's stock market for financial investors.

XFA Market

XFA provides value-added information service to our premium customers by distributing market information on companies, listed as A-shares in Shanghai and Shenzhen stock exchanges. XFA selects and analyzes valuable information which is part of the massive information sources.

XFA highlights changes and other significant events in the financial market in order to assist market traders to adjust their investment strategies quickly to their advantage.

Earlybird

summarizes all the important news and market trends that could significantly influence the stock market, 10 hours before every trading day, to help investors catch up next day's hot spots; fees include macroeconomic news, policy changes, and industrial development, as well as information pertaining to listed companies.

Strategy

provides in-depth analysis of the market information twice a week: policy interpretation and estimation, review of macro and regional economies, and in-depth analyses of particular industries and companies. Most of the information is exclusive and specific on a stock or sector, covering medium to long term targets.

Buy-low-sell-high

provides dozens of real-time news feeds during every trading day and focuses on profit taking short- to medium-term trading strategies. It includes more recent important market moving information and references for securities investors in order to help them adjusting their investment strategies to their advantage.
